Business Technical Analyst with enterprise experience supporting product delivery, system integrations, and data-driven decision-making across cross-functional teams. Proven ability to translate ambiguous business needs into structured requirements, support testing and validation, analyze data, and produce clear insights for technical and non-technical stakeholders. Experienced working alongside product, engineering, and business teams to improve system reliability, reporting accuracy, and product delivery outcomes.

EDUCATION:

Illinois Institute of Technology, Chicago, IL

Master of Science in Business Analytics (MSBA), BS in Computer Information Systems, Minor in Business Administration

Relevant Coursework: Business Analytics, Database Organization, SQL & Data Modeling, Business Process Modeling, Project Management, Applied Analytics, Reporting & Data Visualization

Awards and Honors: Dean's List, Merit Scholarship

EXPERIENCE:

Business Technical Analyst, McDonald's

May 2025 – December 2025

- Owned functional documentation and AI-enabled workflows for high-volume, enterprise-scale system initiatives, translating business and product needs into clear workflows, acceptance criteria, and data validation rules to support adoption and operational efficiency.
- Partnered closely with engineering and QA to validate data accuracy and system outputs across complex, integrated platforms, identifying root causes and preventing defects prior to production releases.
- Built and maintained tracking artifacts and delivery reports (Excel, JIRA, Confluence) used by cross-functional stakeholders to monitor status, dependencies, and delivery risk.
- Supported integration-related changes across upstream and downstream enterprise systems, ensuring consistency and alignment of data flows across releases.

Junior Developer, Vigno Inc.

February 2025 – May 2025

- Analyzed end-to-end business workflows to identify data gaps, inconsistencies, and system improvement opportunities.
- Translated business needs into functional system enhancements and supported end-to-end testing and validation.
- Produced concise documentation summarizing findings, risks, and recommendations for technical and non-technical stakeholders.

Associate Program Manager, International Students Learning

July 2023 – May 2024

- Coordinated operational programs supporting 500+ participants, managing timelines, communications, and execution across multiple workstreams.
 - Synthesized qualitative and quantitative data into structured summaries and reports used for planning and process improvements.
 - Acted as a central point of coordination between leadership and cross-functional teams.
-

PROJECTS:

University Event Calendar Website | Human-Computer Interaction, API Integration

August 2024

- Built a web application that ingested and structured external API data for real-time display and filtering.
- Defined data mappings, edge cases, and validation logic to ensure consistent and accurate outputs.

Weather Website, Database Organization | SQL, HTML/CSS

January 2024

- Designed normalized database schemas and wrote SQL queries to support trend analysis, reporting, and data validation.
- Improved query performance and data accuracy through indexing and schema optimization.

RPA with Protiviti | RPA, Data Extraction, Automation, UiPath

August 2022

- Automated extraction and validation of structured and semi-structured data, reducing manual effort by 40%.
 - Implemented exception handling and logging to improve reliability and auditability.
-

SKILLS:

- **Analytics & Data:** SQL (SELECT, JOIN, GROUP BY), data validation, reporting, trend analysis, quality checks
- **Systems & Process:** Requirements gathering, process & workflow documentation, system analysis, root-cause analysis, QA/UAT, defect triage
- **Tools & Platforms:** Excel, PowerPoint, Power BI (working knowledge), JIRA, Confluence, Power Apps, Salesforce
- **Collaboration & Communication:** Cross-functional stakeholder engagement, client & leadership documentation
